

SkillMatch - OJT Signup Flowchart

The **active_signup** table is for users who have not yet finished their signup process. It is used to store their current form information.

At this point, the user already has an account, but the signup process is still not finished. If they sign up again, they will return to the farthest step they reached.

active_signup	
PK	<u>signup_id</u>
	user_id // reference for the user
	step // farthest step they are on
	created_at // creation of the data
